- GitHub: https://github.com/gokulakannanv04
- Leetcode: https://leetcode.com/gokulakannan04_

Projects

- **Portfolio**
  This website serves as a detailed showcase of my personal profile and projects. It's designed using HTML, CSS, and JavaScript, offering an insight into my skills and experiences.
  https://gokulakannan.televein.in
- **Televein**
  Televein's website caters to our startup venture, providing comprehensive information about our business offerings. Developed collaboratively with my friends, it utilizes HTML, CSS, and JavaScript to communicate our vision effectively.
  Link:https://televein.in
- **BioCakes**
  This website is dedicated to showcasing our client's cake products. Created using ReactJS by me and my friends, it offers an interactive and visually appealing platform for exploring and ordering delicious treats.
  https://biocakes.televein.in
- **V.S.B. Chatbot**
  V.S.B. Chatbot is an educational web chatbot tailored specifically for students in grades 10 through 12. It provides study materials, previous year question papers, and textbooks to aid in their academic endeavors. Developed using ReactJS by me and my friends.
